

# INFRASTRUCTURE

Fyfe have more than 25 years experience in infrastructure

## Company Overview

Fyfe Pty Ltd is an engineering consultancy and survey company with its head office in Adelaide, South Australia. Since Fyfe commenced in 1982 as a survey practice, the company has become a significant player in providing engineering consultancy services to the resource and land development industries and Local and State Government.

Fyfe now employs around 220 people throughout Australia and eight locations including Adelaide, Brisbane, Darwin, Alice Springs, Moomba, Ballera and Roma. The Fyfe group consists of four companies; Fyfe Pty Ltd in Adelaide and Brisbane, MJ Hedges Geomeasure Pty Ltd in Roma, Gilbert & Associates Pty Ltd in Adelaide and J Matthews & Associates in Darwin and Alice Springs.

## Infrastructure Resources

Fyfe has more than 80 people working on infrastructure projects in South Australia, Queensland and the Northern Territory. Fyfe has maintained ISO 9001 Qualification certification since 1994 to ensure clients are provided with high quality services. Fyfe recognise that excellence in occupational health, safety and work practices of the company is a priority. Fyfe has an excellent safety record.

## Infrastructure Experience and Services

Fyfe has extensive experience in engineering and survey work for infrastructure projects including petroleum and water pipelines, roads, power lines, railway lines, wind farms, waste water management and other infrastructure projects over the past 25 years.

This work has been undertaken for all sectors of the infrastructure industry including local and state governments, land developers and major resource companies in the following areas:

- Feasibility studies and preliminary investigations to examine alternatives and define the optimum development
- Design and documentation in relation to infrastructure land including site surveys, land acquisition and optimising the location of facilities
- Gas, oil and water pipeline design and front end engineering work
- Wind farm layout and survey work
- Urban and rural road designs
- Waste water management system design and

project management

- Railway, Power line communication line surveys and design
- Preparation of working drawings, specifications, cost estimates and contract documents for tendering and construction
- Evaluation of tenders, construction supervision and appropriate licensing and certification.

## Current and Completed Projects

Current and recently completed infrastructure projects:

- Alice Springs to Darwin railway line corridor acquisition, track laying and as built surveys and corridor mapping photo control
- Design and survey of over 1000kms of urban and rural roads including Stuart Highway duplication
- South East Queensland water pipeline system development surveys and various drain surveys for the South Australian Department of Water, Land and Biodiversity Conservation
- Starfish Hill, Clement Troubridge Point and McCarthur wind farm set out and survey
- SA Housing Trust Kilburn and Salisbury North water detention basin design and project management
- Numerous land subdivision designs, contract supervision and survey of roads, stormwater systems, effluent drainage and sewer systems for councils and property developers
- Murraylink interconnector and Bachelor to Rum Jungle power line surveys
- Over 1200 gas and oil pipeline surveys and design.
