

OIL & GAS DESIGN SERVICES

Fyfe field gathering system specialists

Company Overview

Fyfe Pty Ltd is an engineering consultancy and survey company with its head office in Adelaide, South Australia and major offices in Brisbane, Queensland and Darwin, Northern Territory. Since Fyfe commenced as a survey company in 1982 it has broadened its activities to now include engineering consultancy work in the oil and gas industry. The Fyfe group currently employs more than 220 people located in eight offices throughout Australia – Adelaide, Brisbane, Darwin, Alice Springs, Moomba, Ballera and Roma. Fyfe's other companies include MJ Hedges Geomeasure Pty Ltd, a fully owned affiliated Queensland survey and GIS company, Gilbert & Associates Pty Ltd, a civil engineering company, and J Matthews & Associates, a Northern Territory survey company.

Oil and Gas Resources

Fyfe has more than 70 people working on oil and gas related projects in both South Australia and Queensland. Fyfe has maintained ISO 9001 Qualification certification since 1994, which ensures clients are provided with high quality services. Fyfe recognises that excellence in occupational health, safety and welfare is a priority in the day to day activities and work practices of the company. Fyfe has an excellent safety record.

To aid in delivering its oil & gas services, Fyfe has developed a software application called Project Tracker. Project Tracker provides for the efficient collection and retrieval of information in relation to regions and projects. Fyfe has also invested in a number of other applications including AutoCAD, Arc View, MapInfo, Cad Overlay, Auto Cad Map, Infrasoftware, 3D Smart and Carlson which are available to drafters working on the latest graphical workstations.

Oil and Gas Services

Fyfe can provide the following design services to the oil and gas industry:

- Front End Engineering Design (FEED) for pipelines and facilities covering chemical, mechanical, civil instrumentation and electrical engineering disciplines
- Well head construction design documentation

- Gathering line route selection and design
- Pipeline route selection and easements
- Project management services.
- Survey and GIS services for well head, gathering line and transmission pipelines.

Fyfe also offers specialist pipeline and wellhead maintenance services including pipeline patrols, corrosion monitoring and assessment services.

Current and Completed Projects

Fyfe has successfully completed and is currently undertaking several projects in the oil and gas area:

- Design and survey for the Santos Cooper Oil project including more than 100 wells and associated facilities per annum
- Design and associated facilities for Beach Petroleum oil wells
- Design and associated management of the Cooper Basin gas well development for Santos
- Completed the design and survey for over 1200 wells in several Australian basins
- Completed the design and survey for over 1100 gathering lines in several Australian basins.
